Description

EVERAGE BLACKOUT RE

Performance Rear Boot.
Sing, combraids and dumble the LEVERAGE ELACKOUT is what a rear rubber binding was always meant to be. We have improved the fit, comfort and quality of the Leverage binding. Like our skis, the new LEVERAGE BLACKOUT is built entirely in the USA utilizing only the best materials available.

The LEVERAGE BLACKOUT rear boot is for the skier looking for a no-nonserase, flexible design that fits very snug, keeping the skier connected to the ski, while still allowing a full 360 degrees of motion to the upper ankle. The best word to use in describing the performance of the LEVERAGE BLACKOUT rear boot is "forgiving".

If you have searched for the right rear boot to match with your REFLEX Hard-shell front or you are looking for a rear boot that keeps your foot in place but is soft enough to allow the skier to focus the control on the front foot, look no further. Skiers seeking more lateral support and a stiffer upper ankle design see our T-Factor real size binding.

is keeping with D3's "performance first" philosophy we use only screen printed graphics on the LEVERAGE BLACKOUT. Using maked rabber or plastic accountments as graphic elements can limit a bindings ability to stretch. This can also make a binding stiffer. For this reason we have stayed away from flestly graphics and

For the LEVERAGE BLACKOUT rear boot we have removed the plastic heel support found in the front foot version. We chose to make this rear boot as soft and flexible as possible. We believe strongly that the majority of a skiers control should be provided by the front foot. By reducing the stiffness of the LEVERAGE BLACKOUT rear boot we make skiing front foot prominent easier. Because spacing between your feet is critical we have designed multiple options for positioning the LEVERAGE BLACKOUT rear boot we make skiing front foot prominent easier. Because spacing between your feet is critical we have designed multiple options for positioning the LEVERAGE BLACKOUT rear boot. The traditional time-stots on the plate to move forward and back, additionally one can move the boot itself on the plate forward.

e LEVERAGE BLACKOUT rear binding does not have baces. Our new overlay design features a generous opening making the LEVERAGE BLACKOUT easy to get info. Each toe and heel nubber feature a sewn, padded, nylon strap handle which also facilitates easy entry and provides the ultimate in durability.
